

AWS Cost Report

Client: **test-aws-client**
30-Day (daily): **2025-09-01 → 2025-10-01 (end exclusive)**
12-Month (monthly): **2024-09-01 → 2025-09-01 (end exclusive)**

High-Impact Cost Checks

This section summarizes potential savings and risks (e.g., idle EC2, unattached EBS, data transfer spikes). It can be auto-generated and optionally edited before sending to a client.

- ✓ EC2: All instances reviewed — no idle/oversized detected.
- ✓ S3: Buckets within expected thresholds.
- ✓ Data Transfer: No suspicious inter-region transfer spikes.
- ✓ EBS: All attached volumes showed consistent activity.

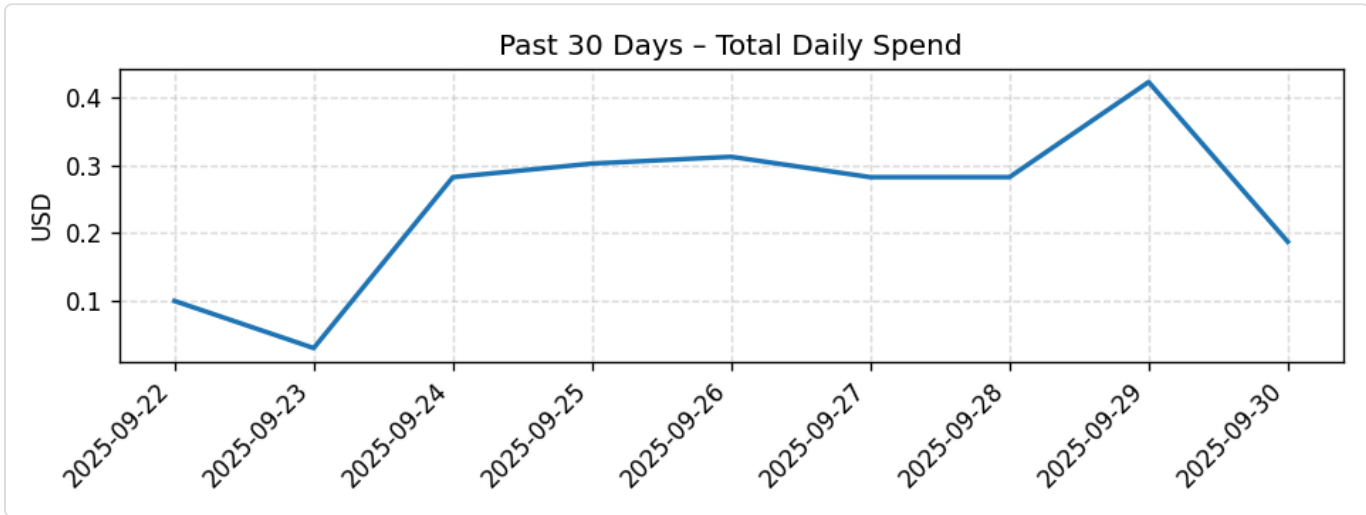

Executive Summary

- Past 30 days spend: \$2.
- Potential savings: (placeholder – actual cost savings will go here)
- Largest daily spike on 2025-09-29: \$0 (≈86% above 7-day avg).
- Trend: N/A (not enough data for 60 days).

Projected Savings Summary

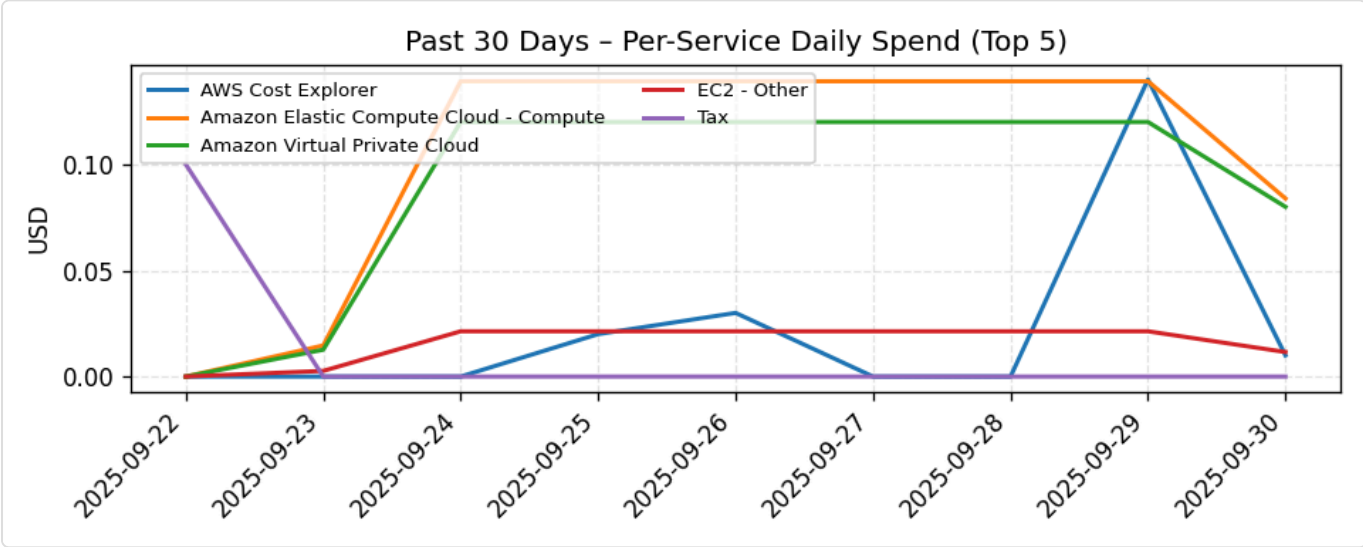

- Estimated Monthly Savings: \$0
- Estimated Annual Impact: \$0.0
